**Dr. Kay Resigns**

Because Of Views

BY CAROL HENKIN

In a move which has caused much controversy on campus and is the subject of much discussion, Dr. Henry C. Her of Gainesville, Assistant Professor of Art, has resigned his position effective at the end of this year.

Dr. Kay said he resigned because LaGrange College has failed to comply with the stand of the Methodist Church in its agreement with the United States Civil Rights Act.

Dr. Kay, who knew of no other way to protest the decision of the Board of Trustees to maintain a closed-door policy, said that he feels he must abide by the stand of his Church.

Dr. Kay continued, "Our philosophy of education, as stated in the catalogue, is based on preparing students to become citizens of a democratic society, and I feel that my part in this decision aids that or really moral issue."

Dr. Wagnitz G. Henry stated, "Dr. Kay is a valuable man and is a strong contributor to the college. He has our support in the right to the expression of his convictions. Time will soon indicate if the trustees and administration are fully aware of their responsibilities in this matter."

Since resigning, Dr. Kay has accepted an offer from Emory University to take the newly created position of Academic Dean there. He will assume his new duties in August.

The South Shall Rise Again"  

"The South shall rise again," is evidenced by progress and enthusiasm of Atlanta and vicinity. Other portions of the state and the whole South in general are on the way up. Will LaGrange College be left behind?

The Hilltop News as appalled by the lack of reaction to the editorials that have been printed on apathy. No one seems to be concerned. No comments have come to this paper from the faculty or students (except from the staff.)

Evidence shows that the LC students have become so involved in their own little worlds that they are perfectly unaware of the attitudes of the "Outside World." If this evidence proves true, should not someone who is interested, if any exist, step forward at least to admit this truth and realize that a problem exists. This realization has not come to the majority of the LC students or faculty but it is necessary the first step toward a solution.

We find it easy to criticize and defend such things as the food in the cafeteria but very little seems to be said about such things as world problems, current scientific discoveries, or local, state, or national political events. There is no question that personal problems are more important than anything else, but does this exclude everything else? Or, does there exist an "Outside World."
